Mr. Justin Bell

President

Credera

15303 Dallas Parkway, Suite 300

Addison, Texas, 75001

Dear Mr. Bell,

I am writing to apply for the Software Development Intern position at Credera, which I discovered through the University career fair. I am particularly excited about this opportunity because of Credera's commitment to fostering a culture of connectedness and its mission to make a meaningful impact on clients, employees, and communities. With a Bachelor of Science in Information Technology and currently pursuing a Master of Science in Computer Science with a specialization in AI and ML, I am eager to contribute my skills and learn from your talented team.

During my studies, I have developed strong analytical and problem-solving abilities essential for this internship. I have hands-on experience with programming languages such as Python, JavaScript and Dart, and I recently completed a software development project where I designed and implemented an application to streamline data processing. This project not only honed my technical skills but also taught me how to work effectively in a team, enhancing my communication and collaboration abilities.

I am excited about the chance to bring my enthusiasm for software development to Credera and learn from your experienced professionals. I believe this internship will allow me to apply my knowledge while also helping me grow and develop new skills in a supportive environment.

Thank you for considering my application. I look forward to the opportunity to discuss my candidacy further and hope to hear back from you soon.

Sincerely,

Anthony Stephen Aryee
