aaryee@smu.edu | [linkedin.com/in/anthony-stephen-aryee-65137961](https://www.linkedin.com/in/anthony-stephen-aryee-65137961) | 971.890.0579 | Dallas, Texas

OBJECTIVE: Meticulous and customer-focused graduate student in Computer Science, with a strong foundation in AI/ML and Software Engineering. Experienced in troubleshooting, providing technical support, and developing software solutions with a focus on user experience. Proficient in Python, Java, and cloud technologies, with a passion for delivering innovative and efficient solutions. Eager to leverage my soft, and technical skills and problem-solving abilities to provide exceptional support and contribute to a positive customer experience as part of the Apple Support team.

EDUCATION: **Southern Methodist University** Dallas, TX
Bobby B. Lyle School of Engineering May 2026
Master of Science in Computer Science

RELEVANT COURSES: Software Engineering, Algorithm Engineering, File Organization and Database Management System, E-Commerce, Mobile Computing and Python for Data Science, AI and Development.

SKILLS: **Technical:** JavaScript, TypeScript, React, Python, Java, PHP, Dart, Angular, Flutter, Laravel, MySQL, PostgreSQL, Firebase, Git, GitHub-Action and Docker.

Professional: Leadership, Customer Service, Adaptability, Teamwork and Problem-solving.

Certifications: Customer Service – NASBA LinkedIn Learning, AI Projects with Python - LinkedIn (2024), Python for Data Science & AI, Development - IBM Coursera(2024), Multi-Cloud & DevOps - The Cloud Bootcamp (2023), Advance Angular - Edx – Microsoft (2018), NodeJS Master-Class – Pirple (2021).

ENGINEERING PROJECTS:

University Evaluation API, *Software engineering*

- Led the development of a robust API using Python and database system to facilitate the evaluation of academic programs within a specific department. This system streamlined the collection, storage, and analysis of key metrics, including course performance, student feedback, and faculty assessments.
- Collaborated with team members to gather requirements and ensure the system aligned with the department's evaluation goals, resulting in a user-centered solution.
- Directed the team in maintaining project documentation and version control, ensuring clear communication and facilitating smooth progress tracking among all members.

Bus Routes API, *Software engineering*

- Mastermind a comprehensive Bus Routes API using Python, enabling efficient route planning, schedule management, and real-time tracking for users.
- Conduct code reviews, promoting best practices and adherence to coding standards.
- Incorporated features such as dynamic route optimization, bus stop information, and timetable integration to improve user experience and operational efficiency.

Database Application, *Database Management*

- Developed a relational database using MySQL, implementing complex queries and optimizing performance
- Identified data redundancy issues and designed an efficient schema to improve data integrity and retrieval speed
- Worked in a team of four, coordinating tasks and integrating individual components of the application.

WORK EXPERIENCE:

Nafi Properties, *Software developer (Co-Ops)*, Dallas, Texas

Aug. 2023 – Mar. 2024

- Developed and maintained Web and Mobile application using Dart, Flutter and Firebase.
- Identify and resolved bugs in the application that improved app reliability, reducing user reported issues by 40%.

- Worked closely with product managers, contributing to brainstorming sessions and integrating feedback into development cycles.

MV-Parts, Full-Stack developer, Philadelphia, Texas

Jan. 2023 – Jul. 2023

- Spearheaded the implementation of microservices architecture for RESTful APIs using Java Spring Boot.
- Diagnosed and resolve security and performance issues, improving application load times by 30% through refactoring techniques.
- Effectively communicated project updates and challenges during daily stand-ups, ensuring alignment with team goals.

Internship Africa, Web Developer, New York, New York

Feb. 2021 – Dec. 2022

- Designed and developed responsive website using Angular and TypeScript.
- Implemented back-end functionality using NodeJS and Express, streamlining data processing and management.
- Resolved cross-browser compatibility issues, ensuring consistent performance across multiple platforms and improving user experience.

UNIVERSITY INVOLVEMENT:

IEEE, Chapter Member

October 2024 – Present

- Showcased problem-solving abilities by actively contributing online.
